

What is good regulation?

Presentation to the PSA Policy Symposium, October 2025

Marcial Boo, Chair Institute of Regulation

Marcial Boo, Chair of Institute of Regulation

Chief Executive, Insolvency Practitioners Regulator

Previously:

- Chief Executive, Equality and Human Rights Commission
- Chief Executive, Independent Parliamentary Standards Authority
- Chief Executive, UK Public Health Register
- Director, National Audit Office
- Director, Audit Commission
- Senior Civil Servant, UK Government (Home Office, Dept for Education, Downing St)

The Institute of Regulation - home of good regulation

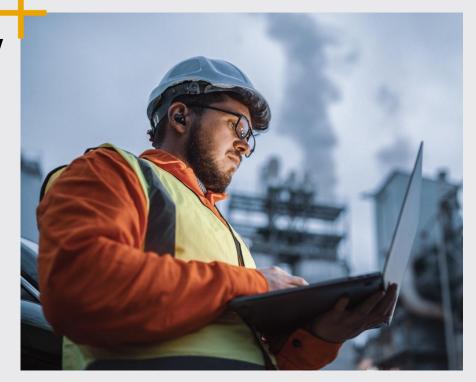

Established in 2021

We exist to:

- provide and promote education and training in the theory and practice of regulation
- research, develop and promote good practice in regulation

We are an inclusive community of regulatory professionals and experts.

New members can expect a warm and supportive welcome.

Institute of Regulation Introducing the Institute of Regulation

The components of good regulation

- 1. Understand regulation
- 2. Collaborate
- 3. Be professional
- 4. Be proportionate
- 5. Use data and AI
- 6. See regulation as a system

Institute of Regulation Introducing the Institute of Regulation

1. Understand regulation

INSTITUTE OF REGULATION

Some use a narrow definition:

 Regulations are secondary legislation: law made by a body other than Parliament within the framework of an enabling Act. Regulations specify detailed requirements or standards developed to implement the principles and objectives set out in primary legislation.

Others think more broadly:

Regulation is the use of rules, incentives and penalties to change the behaviour of individuals or organisations. The rules may be laws but also involves setting standards and monitoring performance against them and enforcing compliance.

What does regulation mean in your own context?

Our understanding of regulation

Regulation is the management of complex systems according to clear rules and the law

Regulators apply rules **fairly and consistently** to **balance**:

- Protection for consumers and users of services
- Opportunities for business innovation and public service improvement

Good regulation means understanding all these components in your own context.

2. Regulation involves collaboration

Service Regulation Health, housing,

Public

justice, education, social work

Economic

Regulation

Utilities: water,

energy,

transport,

telecoms

Financial

Regulation

Banking, finance,

insurance,

competition

Ethics Regulation

Constitutional and standards watchdogs

International Regulation

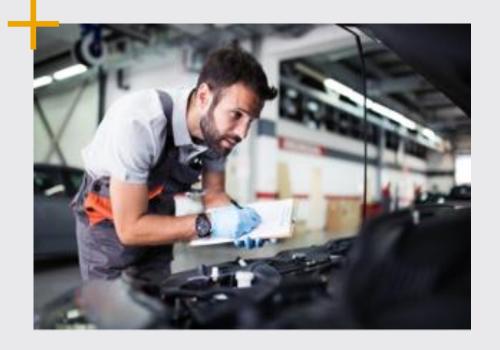

Internet, climate, cross-border, EU directives post-Brexit

Professional Regulation

Law, medicine, vets, engineering, statistics, built environment

Business Regulation

Food, products, health & safety, environmental health

... including in health and social care...

Care Quality Commission; Food Standards Agency; Health Research Authority; Human Fertilisation and Embryology Authority; Human Tissue Authority; Medicines and Healthcare Products Regulatory Agency (MHRA); Professional Standards Authority for Health and Social Care (PSA); General Chiropractic Council; General Dental Council; General Medical Council; General Optical Council; General

Osteopathic Council; General Pharmaceutical Council; Health and Care Professions Council; Nursing and Midwifery Council

... working with other parties ...

- Regulators outside health and social care (Information Commissioners Office, Equality and Human Rights Commission, Health and Safety Executive, Charity Commission, Ofcom, etc.)
- Government (Department for Health and Social Care, Cabinet Office, etc.)
- Those you regulate
- Representative groups (charities, lobby groups, unions, etc.)
- The media
- Members of the public

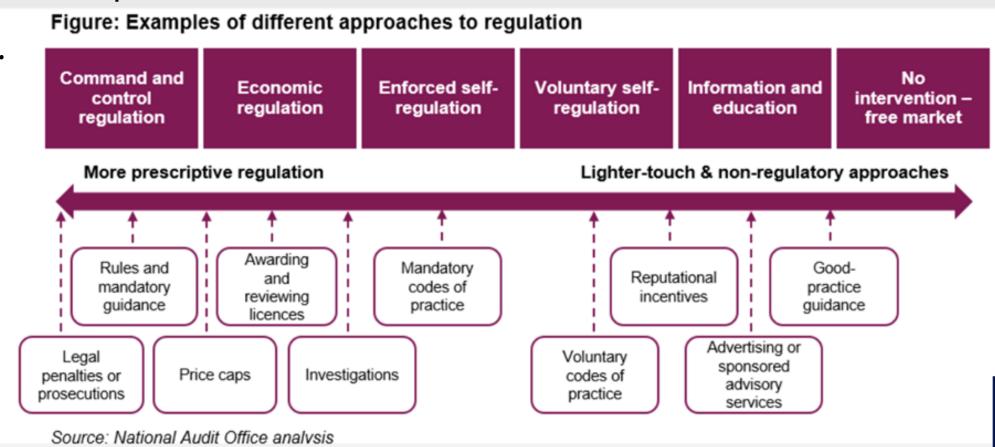

Good regulation involves working well with others.

3. Professionalism matters

How do your regulatory staff learn, and where from?

For example:

... such as from training and podcasts ...

Introduction to Regulation

Understanding Regulation Fundamentals of Regulation

Masterclasses in Regulation

Good regulation means knowing your stuff.

4. Make regulation proportionate

UNREGULATED

Known to be safe

REGULATED

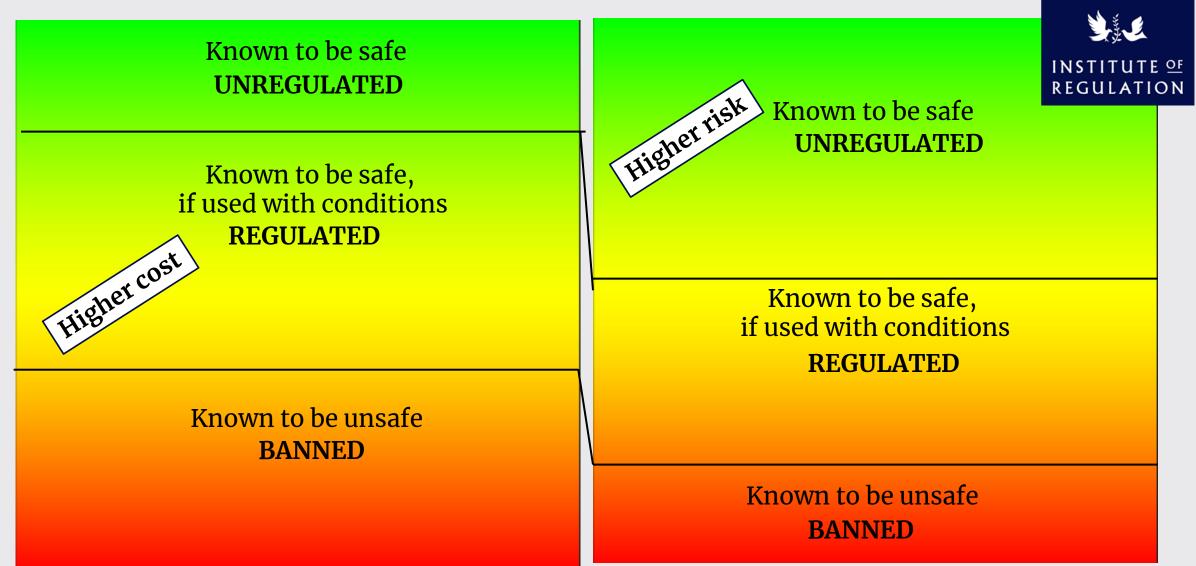

Known to be safe, if used with conditions

BANNED

Known to be unsafe

Proportionate regulation is hard in practice

Good regulation gets the balance right

5. Good data and evidence underpin regulation

Data tells you:

- What's going on
- Where are the risks
- How to prevent harms

Evidence supports good decision making

- Frontline judgments
- Strategic prioritisation

Data and evidence builds confidence

- Influencing regulated entities and wider stakeholders
- Positive competitive incentives

Good regulation means getting tech right first

Best: AI

Better: data

Good: technology

6. Good regulation involves thinking about systems

- 1. Clear, well-defined goals
- 2. Strong, legitimate authority
- 3. Well-understood groups whose actions or behaviour is to be managed
- 4. Fair, proportionate, well-communicated, agile rules
- 5. Fair, proportionate, consistent consequences
- 6. Effective, efficient enforcement and regulatory agencies
- 7. A culture of compliance

Thank you – and good luck!
